Give a complete description of your machine for selling it.

(Teacher's example)

PICKING CUMBA 3.0. Machine.

The Picking Cumba machine is perfect to pick and clean up very easily all the mess and spread items in your house. This machine will transform your concept of cleaning.

The Picking Cumba allows you to pick up all the mess at home. It includes an electric motorbike with four arms that allows you to move around the different rooms and garden picking up and cleaning up all the mess. It can pick up toys and threw items, bend blankets, shake cushions and sheets, clean the dust, sweep, etc. It will save you a lot of time of housework and it will do for you the most hated tasks at home.

The picking Cumba is made of the ultimate materials. The bike body is made of 100% recycled plastic. Wheels and arms are made of stainless steel, and recycled rubber. Its materials have the following properties:

- a. Light and cheap: recycled plastic is resistant but lightweight, in order to favor mobility and prevent crushes.

- b. Resistant arms: they are made of stainless steel, an alloy that resists rust and corrosion but keeps resistance and hardness.
- c. Hands with gloves: gloves are made of latex and rubber air balls, a material easily cleanable, it is thermal and electricity insulator, it is flexible and precise.

Lastly, it has a smart and beautiful fashioned design. You have blue, red and yellow version available for your motorbike. The machine has three small and quick wheels to move around rooms and corners easily and the cabin includes latest technology devices (Bluetooth, air-conditioning, airbags, ergonomic seats and adaptable steering wheel). Don't doubt it and buy this fantastic machine for less than you think that you can pay in easy instalments.

Now is your turn, describe your invention:

2. Voluntary- Draw your invention prototype and a poster ad for its marketing campaign.
