

# THE PHYSICAL GEOGRAPHY OF SPAIN

Spain is located in the **SOUTH-WEST of Europe**. Spain also has 2 archipelagos and 2 cities in the north of Africa. There are a lot of **different** types of **landscapes and landforms** in Spain.

## PYRENEES

The Pyrenees form a mountain range that makes a natural border between Spain and France.

## PLAINS

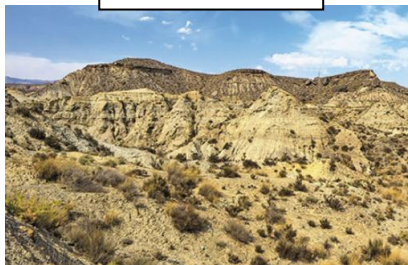

There are many in Castilla la Mancha and Andalucía.

## COAST

There are over 7000 kilometres of coast in Spain.

## DESERT

The only desert is in Almería, in the south east. It is called DESIERTO DE TABERNAS.

## ARCHIPELAGOS

There are two big archipelagos: Islas Canarias and Illes Balears.

## MESETA CENTRAL

It is a big plateau located in the centre of the Iberian Peninsula.
