

TAREA 8: Introduction to economy. Tienen que leer el texto y hacer los tres ejercicios que van a continuación.

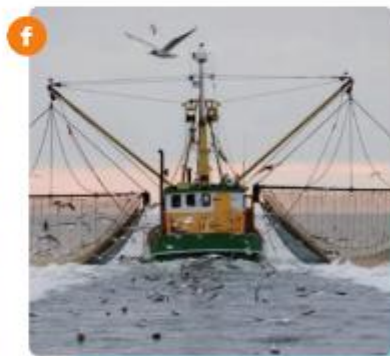

*Pueden escuchar el texto en el libro digital (Social Science), página 66 (con las claves que os hemos mandado).

Jobs can be grouped into three economic sectors. The primary sector obtains products directly from nature, the secondary sector processes raw materials and manufactures new products, and the tertiary sector provides services. Most people in Europe worked in the past in the primary sector. However, modernisation of farms meant there were not enough jobs in agriculture and people began to move to the city.

1. Complete the chart below using the words in the box.

<ul style="list-style-type: none">• construction industries• fishing• education• base industries• tourism• forestry• media and communication		
primary sector (extraction of raw materials from the ground)	secondary sector (manufactured products)	tertiary sector (services)
<ul style="list-style-type: none">• arable farming• livestock farming•• mining•	<ul style="list-style-type: none">• capital goods industries•• energy industries• consumer goods industries•	<ul style="list-style-type: none">• retail• administration•• trade• transport• healthcare•

2. Classify these photos according to the economic sector they belong to (primary, secondary or tertiary).

3. Choose four members in your family that have a job. What is their job? In which of the three economic sectors do they work?
